

About HulkApps Pvt. Ltd.:

We build intuitive Shopify apps and provide valuable development services for high-volume e-commerce stores at competitive rates. We are pledged to building wonderful eCommerce experiences on Shopify for both buyers and shoppers and driving growth. The skills we keep pride in are **Shopify, Ruby on Rails, Graphics Design, Mobile Apps - IOS & Android, PHP, and Digital Marketing.**

We're a team of 140+ consisting of Front-end developers, Back-end developers, Marketers, Designers, CRO Specialists, Support Associates, and more.

Working at HulkApps Pvt. Ltd. isn't a 12-hour grind; it's an opportunity to spend hours every day collaborating with great friends to make awesome work.

Our agency supports us to live our lives, not the other way around. We place a high emphasis on a balanced work-life, family support, and creating a supportive, motivating work environment that feels like home (but isn't intended to replace your home).

We enjoy having in-person check-ins and chats with each other to create real relationships in an increasingly online environment, even though we believe in working digitally.

HulkApps Pvt. Ltd. brings together incredible people who truly care for our merchants. We provide our employees with a variety of competitive benefits to keep them healthy, happy, and encouraged to do their best work, as well as a supportive and inclusive environment that fosters creativity and collaboration.

We are looking for team players who would fit in with the culture of our organization and we bet; you're gonna love it here..!!!!

Job Description of PHP Developers

HulkApps Pvt. Ltd. is looking for PHP/Laravel developers having professional software development experience, for which required details are mentioned below:

About the Role:

- Write clean, secure, test-driven, easily maintainable, and modular codes.
- Database designing and maintenance.
- Build reusable code and libraries for future use.
- Troubleshoot and debug applications.
- Perform UI/backend tests to optimize performance.
- Collaborate and work with frontend and mobile app developers on the backend needs of projects.
- Adhere closely to development plans and anticipate changes to specifications or schedules as they become necessary during development.
- Work with project managers when gathering requirements, presenting work, etc. and taking complex technical terms and breaking them down into layman's terms.
- Keep abreast of recent trends and best practices in web development.
- Client communication (verbal/written) as and when required.

What you can bring to the table:

- Demonstrable experience with PHP, including OOPs, security, refactoring & design patterns.
- Excellent knowledge of Laravel framework and experience building factories/facades/libraries using abstract classes, interfaces, traits.
- Experience in unit testing using testing frameworks like PHPUnit/phpspec.
- Good knowledge of RDBMS (MySQL/PostgreSQL), database designing, and query optimization techniques. Experience in NoSQL (MongoDB/DynamoDB) databases will be an added advantage.
- Good core knowledge of HTML5, CSS3, jQuery and Bootstrap framework. Experience in Javascript Frameworks (ReactJS/VueJS) will be an added advantage.
- Hands-on experience in RESTful API design and development including implementation of OAuth2.0 for authentication and authorization.
- Experience in microservices development will be an added advantage.
- Working knowledge of version controlling systems like Git, clear understanding of Git workflow, repository management tools like BitBucket, and knowledge of the overall CI/CD process.

- Working knowledge of cloud servers (Heroku/Digital Ocean), related services, and server administration like setting up Apache/Nginx, php-fpm etc. Other nice to have, but not mandatory:
- Docker/Homestead
- Ability to make composer packages.
- Worked with webpack, gulp.js, Babel for browser support.
- Strong problem-solving and analytical skills.
- Excellent written and verbal communication skills in English.

Experience: 2+ Years of relevant industry experience

Qualifications: B.E(Computer Science/IT),B.Tech, B.C.A/ M.Sc(IT)/M.CA

Location: Surat, Gujarat
